

If you're a Boltz Oil Customer, our Service Contract is your assurance of a worry-free winter.

Covers period from July 1 to June 30.
Call today to set up your inspection.

(717) **272-4881**

What You Receive:*

Preventive Maintenance Efficiency Test
Includes efficiency check and items listed below:

- Clean & set electrodes
- Check nozzle
- Check base of chimney
- Check oil filter
- Clean fan & air intake
- Lubricate motors
- Clean and test oil burner controls
- Check belts, pulleys & couplings
- Adjust burner for efficient combustion
- Check smoke pipe
- Adjust draft regulator
- Check oil tank and piping
- Provide customer with full efficiency report
- Parts replaced are chargeable unless covered below

Parts Replacement, when worn out due to normal use. No charge for parts (with allowances noted) – normal labor rates apply to replacement:

- Aquastats (allowance \$100)
- Air cone
- Main thermostat (Clockless, heat only)
- Additional thermostats (\$10 ea.)
- Burner fan & coupling
- Switching relay
- Burner motor
- Warm air fan motor
- Oil pump
- Pump strainer
- Cad cell eye & holder
- Cad cell relay (allowance \$95)
- Delayed oil valve
- Air filter (one set)
- Electrodes & leads
- Fan & limit controls
- Fuses
- Ignition transformer
- Nozzle and assembly
- Oil filter

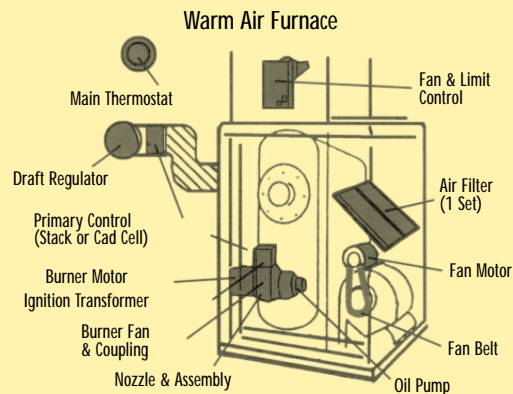

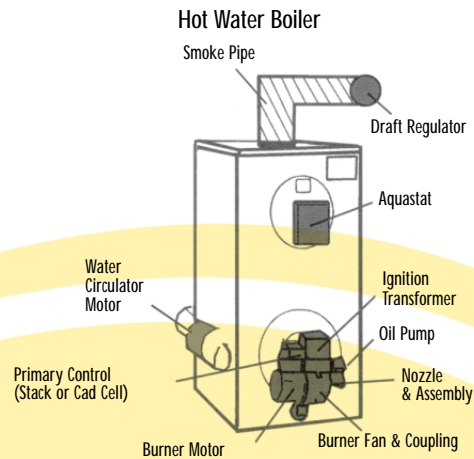

Don't Forget Your Oil Fired Hot Water Heater!

Oil Fired Hot Water Heater Preventive Maintenance is available as an inexpensive option. It checks the operation and performance of these critical parts:

- Aquastat
- Primary control
- Motor
- Transformer
- Fuel pump

All inspections and repairs performed by our factory-trained technicians.

*Subject to General Conditions listed on the reverse side

Areas Not Covered:

- **Heat Distribution:** including air eliminators; balancing; radiators; air ducts, air registers/diffusers; piping; humidifiers; electronic air cleaners; zone control valves; circulator bearing assemblies & couplings, etc.
- **Electrical:** power failure; switch-off situations; thermostat moved, tampered with or set too low; clock thermostat batteries.
- **Fuel Flow & Storage Tanks:** Outside and above-ground fuel flow problems.
- **Water Problems:** ALL water leaks and drainage; ALL water valves and feeder; ALL water adjustments; ALL water problems.
- **Chimney:** Agreement extends ONLY to chimney base.
- **Multi-Fuel Flue-Piping and Chimney Base Heat Surfaces:** Heat exchanger; combustion chamber; boiler, furnace; and their respective jackets.
- **Obsolete Equipment:** or such where parts are not immediately available through usual supply sources. This includes but is not limited to: low pressure, rotary, or vaporizing units.
- **Non-Existent Problems:** "No heat," "No hot water," "Noises," etc.
- **No Responsibility:** For customer failure to maintain adequate water in boiler; failure of low water cut-off, automatic tender.

Normal Labor Rates during regular business hours, Monday-Friday, 8 AM to 4:30 PM. Other times at 1-1/2 times normal rate, minimum 1 hour.
